

Registers records - Appendix

Mapping between register and Gedcom data

Case of a birth

Birth certificate	Individual		
IndiLastName IndiFirstName	INDI:NAME	Optional	replaces the name and lastname of the individual with the name in the record
IndiSex	INDI:SEX	Optional	replaces the sex of the individual with the sex in the record
IndiBirthDate	INDI:BIRT:DATE	Mandatory	adds (or replaces) the individual's date of birth with the date of birth from the IndiBirthDate record or, if the latter is blank, with the event date from the EventDate record.
IndiPlace	INDI:BIRT:PLAC	Optional	adds (or replaces) the place of birth.
IndiComment	INDI:NOTE	Optional	adds the comment in the note of the birth of the individual

IndiFatherLastName IndiFatherFirstName	father:NAME	Optional	<p>If the individual already has parents, If the individual has no parents: searches for families with the same parents' names and with dates compatible with the date of birth (date of marriage, date of birth and death of the parents) If he has several, they are displayed in a list and the user chooses.</p> <p>If the individual does not already have an associated father in the gedcom: searches for individuals who could be the father (same surname and first name, date of birth and death consistent with that of the individual's birth). If he has several, they are displayed in a list and the user chooses. If no potential father is found, creates a new individual who will be the father and creates a family with the individual as a child.</p>
IndiFatherOccupation	father:OCCU	Optional	
IndiFatherDead IndiFatherComment	father:NOTE	Optional	
IndiMotherLastName IndiMotherFirstName	mother:NAME	Optional	same algo as for father IndiFatherLastName
IndiMotherOccupation	mother:OCCU	Optional	same algo as for father's profession IndiFatherOccupation
IndiMotherDead IndiMotherComment	mother:NOTE	Optional	same algo as for Father IndiFatherComment

GeneralComment Witness1LastName Witness1FirstName Witness1Occupation Witness1Comment Witness2LastName Witness2FirstName Witness2Occupation Witness2Comment Witness3LastName Witness3FirstName Witness3Occupation Witness3Comment Witness4LastName Witness4FirstName Witness4Occupation Witness4Comment	INDI:BIRT:NOTE	Optional	These fields are concatenated and added in the note of the birth of the individual.
EventPlace	INDI:BIRT:SOUR	Mandatory	searches for the source associated with the common place of birth. Proposes to create a source if there is no corresponding source.
Cote	SOUR:REFN	Optional	
Photo	INDI:BIRT:SOUR:NOTE	Optional	
Parish	INDI:BIRT:SOUR:NOTE	Optional	

Case of a marriage

Import and export file format

ANCESTRIS format

All four types of statements have the same format: the lines consist of 82 fields separated by a semicolon. The contents of the fields are encoded in UTF-8 format. Each line ends with the separator "\r\n" (end of line in Windows format).

If the semicolon separator character is present inside a field, the field is enclosed in quotation marks when writing to the file. In the same way, if the quote character is present inside a field, a second quote is added after it (see RFC 4180).

Some fields are ignored when Ancestris reads the file depending on the type of event, see the table below.

Tip: It is possible to create a file in Ancestris format with a spreadsheet program to, for example, reuse data already entered with a spreadsheet program.

1. create a table of 90 columns with the spreadsheet program
2. put ANCESTRISV4 in the first column of all rows
3. fill in the other columns as defined below. It is possible to leave cells empty except for the 1st and 8th columns.
4. save data in CSV or TXT format (with semicolon as cell separator)

Column	Birth	Marriage	Death	Miscellaneous	Comment
"ANCESTRISV4"	x	x	x	x	version of the format (mandatory)
CityName	x	x	x	x	city name
CityCode					city code
CountyName	x	x	x	x	county name
StateName	x	x	x	x	state name
CountryName	x	x	x	x	country
ParishName	x	x	x	x	parish name

EventType	"N"	"M"	"D"	"V"	event type
EventTypeTag	ignoré	ignoré	ignoré	x	generic event type
EventTypeName	ignoré	ignoré	ignoré	x	description of generic event type
EventDate	x	x	x	x	event date
SecondDate	ignoré	ignoré	ignoré	x	date of insinuation or recording of the event
Cote	x	x	x	x	Register's reference
Freecomment	x	x	x	x	photo or folio number
Notary	ignoré	ignoré	ignoré	x	name of the notary
IndiLastName	x	x	x	x	Name of the : if N: new born, if M: spouse, if D: deceased, if V: speaker n°1
IndiFirstName	x	x	x	x	firstname
IndiSex	x	x	x	x	sex
IndiBirthPlace	ignoré	x	x	x	place of birth or place of origin
IndiBirthDate	x	x	x	x	date of birth . For a birth it is by default the date of the event.
IndiAge	ignoré	x	x	x	age
IndiOccupation	ignoré	x	x	x	occupation
IndiResidence	ignoré	x	x	x	home
IndiComment	x	x	x	x	comment from the individual or speaker no. 1

IndiMarriedLastName	ignoré	x	x	x	former spouse
IndiMarriedFirstName	ignoré	x	x	x	firstname
IndiMarriedDead	ignoré	x	x	x	deceased or not

Witness4Occupat ion	x	x	x	x	occupation
Witness4Comme nt	x	x	x	x	witness's comment
GeneralComment	x	x	x	x	general comment

NIMEGUE format

The four types of statements have different formats.

- Birth rows contain 30 columns
- The wedding rows contain 60 columns
- The death rows contain 38 columns.
- Rows for miscellaneous acts contain 64 columns

The fields are separated by a semicolon. The last field of the line is always followed by a semicolon. Lines are separated by 2 characters x0A x0D If the semicolon separator character is present inside a field, it is replaced by a period when writing to the file because Nimegue does not support the RFC 4180 recommendation.

Column	Birth	Marriage	Death	Miscellaneous	Description	Importing in Ancestris
"NIMEGUEV3"	x	x	x	x	Mandatory	
CityCode	x	x	x	x		ignored
CityName	x	x	x	x		
CountyCode	x	x	x	x		Ancestris uses CountyCode if CountyName is empty

RecordNo	x	x	x	x	register's number	

EGMT format

All four types of statements have the same format: the lines consist of 44 fields separated by a semicolon. The contents of the fields are encoded in UTF-8 format.

If the semicolon separator character is present within a field, the field is enclosed in quotation marks when writing to the file. Similarly, if the quote character is present inside a field, a second quote is added after it (see RFC 4180).

Some fields are ignored when Ancestris reads the file, see the table below.

Tip: It is possible to create a file in EGMT format with a spreadsheet program to, for example, reuse data already entered with a spreadsheet program.

1. create a table of 44 columns with the spreadsheet program
2. fill in the columns according to the definition below. It is possible to leave cells empty except for the first column.
3. save data in CSV or TXT format (with semicolon as cell separator)

Column	Birth	Marriage	Death	Miscellaneous	Comment
--------	-------	----------	-------	---------------	---------

EventType	"birth"	"marriage"	"death"	"marriage contract" "will"	Event type (mandatory)
