Uso

A página web é muito fácil de gerar. Basta escolher a acção a partir do menu **Ferramentas** -> **Publicação** -> **Página web**.

O Ancestris pede-lhe um local para colocar os ficheiros que constituirão o seu sítio. A pasta indicada deve estar vazia. Os ficheiros nela contidos serão eliminados em qualquer caso. O Ancestris avisa-o se for este o caso. Uma vez escolhida a pasta, o sítio é gerado imediatamente. A janela seguinte aparece para lhe dar o resultado da geração. Pode fechá-la posteriormente:

No final da geração, o seu navegador abre e mostra a página inicial do site gerado. Quando tiver terminado a navegação, poderá fechar o navegador.

Se quiser ver as páginas do sítio web novamente depois, não é necessário regenerar o sítio. Basta abrir o ficheiro index.html que se encontra na pasta que especificou para gerar o sítio.

Além disso, caso deseje copiar o seu sítio para outro meio ou enviá-lo por correio electrónico, pode comprimir a pasta que contém os ficheiros.

Personalização

As páginas geradas podem ser personalizadas no separador da extensão, nas preferências do Ancestris:

As opções de personalização são bastante explícitas. Vamos concentrar-nos nas menos explícitas:

- Formatação de locais: **all** é o único valor disponível de momento;
- Traduzir para o idioma (ISO639 2 letras, e.g. en): em branco para não gerar outro idioma, ou inserir o código do país em 2 caracteres, caso contrário. Os idiomas disponíveis são: da, de, el, en, es, fi, it, nl, pt, sv.
