(Modèle utilisé: Ancestris (v. 1.10))

The Philosophy of this report

The philosophy of this report is to allow each user to create customized sheets, both for the information to be included and for the layout.

To make this as simple as possible, this report is therefore based on templates that the user can modify.

The current version offers many different templates.

The templates consist of several editable files that are located in the user directory.

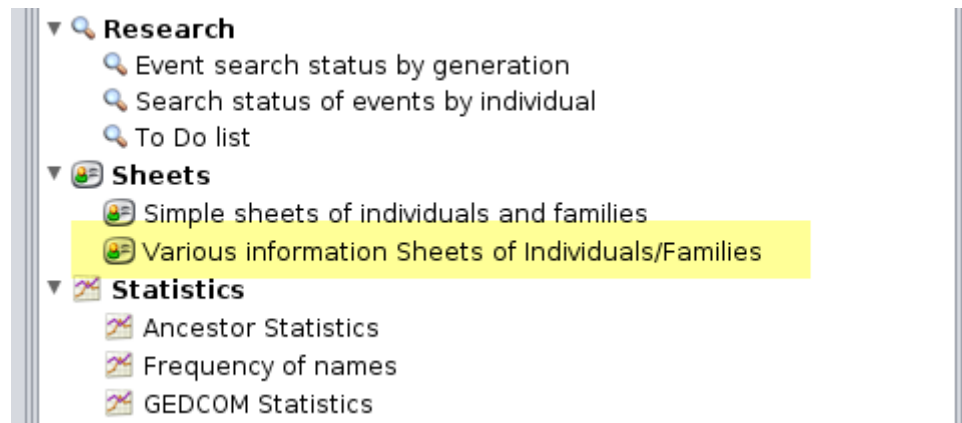

This report is also called the **Gedart Report**.

Gedart is an acronym meaning "**GE**nealogical **DA**ta **AN**alysis and **RE**port **T**ool".

In the word "gedart" we also have two components: GED and ART, i.e. presenting genealogical data in an artistic way or "use your artistic talents on your genealogical data".

How to launch the report

1. This report can be launched either from the [Lists and Reports window](#) to generate all the records of the entire genealogy,

or from a given individual or family by right-clicking and using the [Context menu](#), to manage only the record of a single individual or family.

When you launch this report from the [Lists and Reports window](#), Ancestris runs the reports with the selected individual or family and the close relatives. If the [Advanced search results](#) includes individuals, they are used instead.

Do not run this report on a large genealogy.

Run this report **individual by individual**, or **family by family** ideally, or **on a small number of individuals**.

The generated html file would have a size that your browser would not be able to handle and you would saturate your computer's memory. A warning message will alert you if the size seems too large.

2. Then, in the options of the report, make sure that the options meet your needs and choose the template from the first "Used model" option. This drop-down menu lists all the templates available. This is where templates that you can create yourself should also appear.

Various information Sheets of Individuals/Families	
Used model	Standard sheet
Generate work sheets for Individuals	<input type="checkbox"/>
Generate work sheets for Families	<input checked="" type="checkbox"/>
Include main events, even blank	<input type="checkbox"/>
Show ID numbers beside entities	<input checked="" type="checkbox"/>
Add a Table Of Contents (TOC)	<input type="checkbox"/>
Add an Index for Names	<input type="checkbox"/>
Save result in a file	<input checked="" type="checkbox"/>

The checkboxes are self-explanatory.

3. Once you have chosen the options, **launch the report like the others using the "Start Report" button.**

The report asks you for an output directory and file name to save the report.

The report execution window appears and displays "Completed" if everything went well.

Then your browser opens and displays the result.

Models provided

The models - or templates - provided will give you a good idea of what can be produced as a result.

Ancestors trees

Tree over 5 generations

Displays the ancestry over 5 generations of an individual, on a single page, in a graphic and colorful way.

Decorative tree

Displays on a single page a vertical tree with four generations of ancestors and their marital status information.

This tree is displayed on a tree image in the background. Feel free to replace this background image named "oaktreeC.jpg" with another image. It is located in the directory you chose for the output report at launch.

L'arbre de John, Fitzgerald KENNEDY

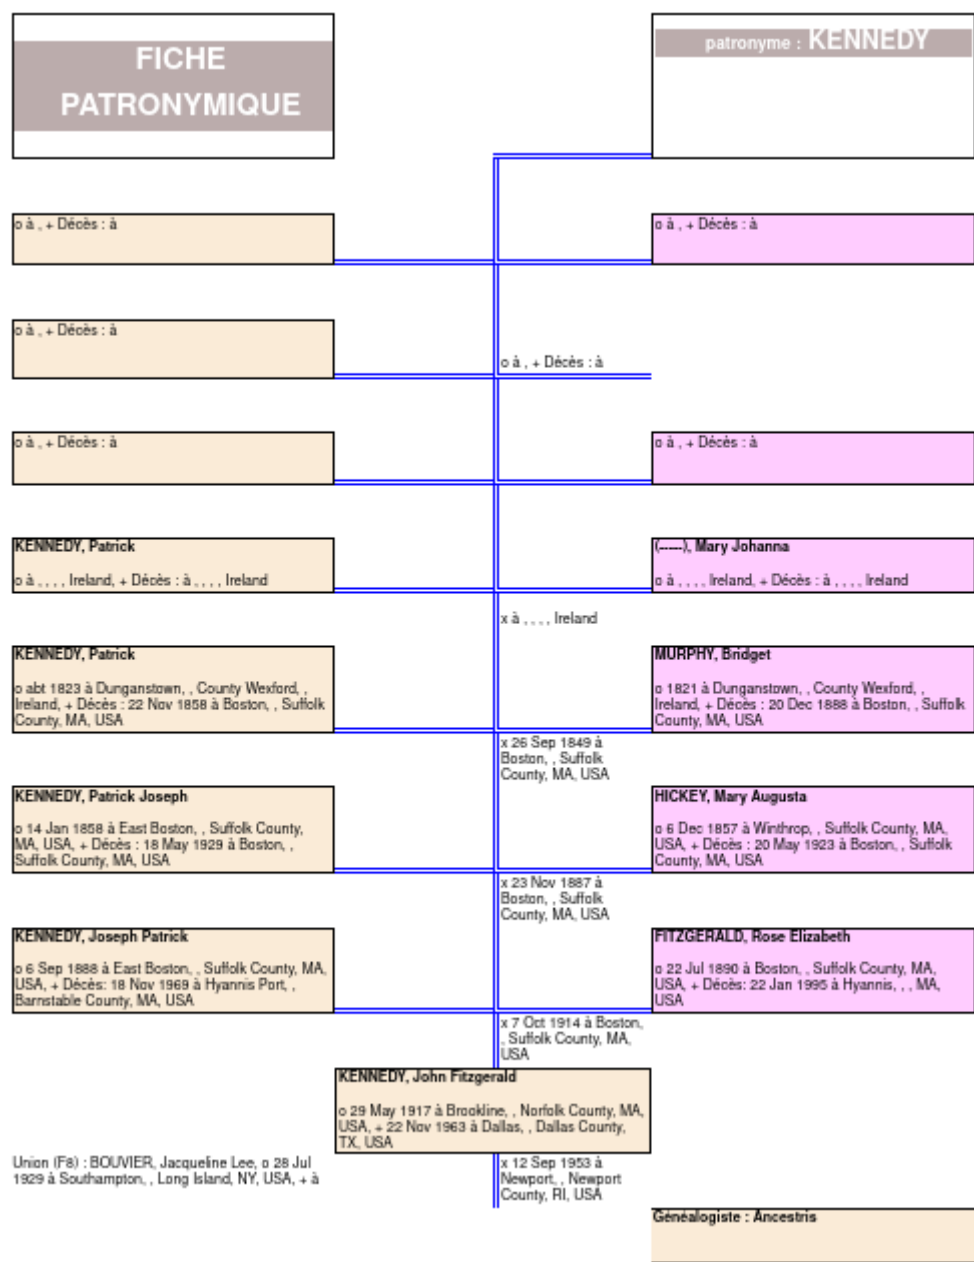

(Fiche générée par [Arbre de généalogie](#) le Saturday, October 17, 2020) ; Modèle Arbre décomposé - ClinDua_arbredeco, (source Daniel Dorand), version : [v. 2.0]

Patronymic tree

Displays on a single page a tree with 7 generations of your ancestors following the family name, i.e. according to the name of the father with that of his wife and their marital status information.

This tree is often requested in genealogical associations to establish directories of the names and surnames studied by the members.

If you wish to show the name of the genealogist creating the report, you must create an information provider, you can even indicate your membership number in your genealogical club.

Information sheets

Standard sheet

These are the two visuals at the top of this page.

They are rich and relatively complete, to give information about an individual or a family.

Fiche Individuelle (R4) : KENNEDY, John Fitzgerald

(Cette fiche a été générée Oct 17, 2020 5:28:03 PM)

John Fitzgerald KENNEDY

Nom complet: KENNEDY, John Fitzgerald

Sexe: Male

Note:

Nom de famille : KENNEDY
Prénoms : John, Fitzgerald

Naissance : 29 May 1917

Note:

Lieu de naissance : Brookline, , Norfolk County, MA, USA

Profession :

US President #35 , (Date : from 20 Jan 1961 to 22 Nov 1963)

Décès : 22 Nov 1963

Note:

Lieu du Décès : Dallas, , Dallas County, TX, USA

Sépulture : 25 Nov 1963

Note:

Lieu de la Sépulture : Arlington, 22209, Arlington County, VA, USA

Parents (P0)

Les parents de KENNEDY, John Fitzgerald, sont :

- **Père :** KENNEDY, Joseph Patrick (R1) (Naissance: 6 Sep 1889 à {sv}) (Décès: 18 Nov 1969 à {sv})
- **Mère :** FITZGERALD, Rose Elizabeth (R2) (Naissance: 22 Jul 1890 à {sv}) (Décès: 22 Jan 1995 à {sv})

Marriage (F8)

Conjoint : BOUVIER, Jacqueline Lee (R37) (Naissance: 28 Jul 1929 à Southampton, , Long Island, NY, USA)

Date du Marriage : 12 Sep 1953

Personnes associées au mariage :

Lieu du Marriage : Newport, , Newport County, RI, USA

Enfants :

- KENNEDY, Caroline Bouvier (R39), (Naissance: 27 Nov 1957)
- KENNEDY Jr., John Fitzgerald (R40), (Naissance: 25 Nov 1960) (Décès: 16 Jul 1999)
- KENNEDY, Patrick Bouvier (R41), (Naissance: 7 Aug 1963) (Décès: 9 Aug 1963)

Renseignements Complémentaires

Événements :

Je n'ai pas trouvé d'événement marquant dans la vie de Monsieur KENNEDY, John Fitzgerald.

Associations :

Monsieur KENNEDY, John Fitzgerald, n'a été associé à aucun événement dans notre généalogie.

Narrative sheets

Biography

Writing an individual biography is not too difficult but requires a bit of method.

This report is intended to make your work easier.

Write your text in the boxes to be filled in, following the tips and using the individual form which in this report serves as your "context".

When you have finished filling in the various boxes, simply press the button "generate a draft of your text" to get a first draft of your biographical text.

You will have to select it with your mouse and copy it, then, in your genealogy, you will create a note under your individual and paste your text into it.

When you edit the report "Complete individual record" your new biography will be displayed at the beginning of the record.

Rédaction de la biographie individuelle de John, Fitzgerald KENNEDY

Rédiger une biographie individuelle n'est pas trop difficile mais demande un peu de méthode. Ce formulaire a pour but de vous faciliter le travail. Écrivez votre texte dans les cases à remplir en suivant les conseils et en consultant la fiche individuelle qui dans ce rapport, vous sert "contexte".

Arrivé à la fin, il vous suffira d'appuyer sur le bouton "générer le brouillon de votre texte" pour avoir un premier brouillon de texte biographie. Il vous suffira de le sélectionner et le copier, puis dans votre généalogie, de créer une note sous votre individu (note) et d'y coller votre texte. Lorsque vous éditez le rapport "Fiche individuelle complète", votre nouvelle biographie s'affichera en début de fiche ! Quoi écrire ? Voici quelques questions ci-dessous que vous pouvez vous poser : répondez-y par des phrases simples et vous verrez que vous aurez très vite un récit plus vivant et intéressant que la simple sortie formatée d'un logiciel de généalogie.

La situation d'état civil :

Le rapport vous fournit ci-dessous une phrase formatée toute prête.

C'est le 29 May 1917 à Brookline, , Norfolk County, MA, USA que naquit KENNEDY, John Fitzgerald de l'union de KENNEDY, Joseph Patrick et FITZGERALD, Rose Elizabeth. Son décès survint le 22 Nov 1963 à Dallas, , Dallas County, TX, USA.
KENNEDY, John Fitzgerald épouse BOUVIER, Jacqueline Lee le 12 Sep 1953 à Newport, , Newport County, RI, USA; leurs enfants furent : KENNEDY, Caroline Bouvier, naissance du 27 Nov 1957 à New York City, , NY, USA, KENNEDY Jr., John Fitzgerald, naissance du 25 Nov 1960 à Washington, , DC, USA, KENNEDY, Patrick Bouvier, naissance du 7 Aug 1963 à Falmouth, , Barnstable County, MA, USA, .

Copiez-la et collez-la dans la fenêtre du formulaire.

Modifiez éventuellement la phrase, complétez-la si vous le souhaitez en consultant le texte des différentes citations des sources, en fin de fiche.

Résidence :

Où la personne étudiée a-t-elle habité ? Quand ?
Le rapport vous donne les indications suivantes :

Copiez la liste fournie par la fiche, collez-la dans la fenêtre du formulaire.

Ensuite, ajoutez des compléments. Ainsi, si un lieu d'habitation a une certaine importance, faites une description rapide du village, de son histoire (voir sur [Wikipedia.org](https://fr.wikipedia.org/wiki/Brookline)). Expliquez éventuellement pourquoi la personne concernée a changé de résidence (mariage, travail) ? (conseil : allez faire une photo numérique de chacun des lieux connus ou supposés, de la tombe pour les plus récents).

Century of generations

An individual's "Century of Generations" report provides a booklet containing information on three generations.

After a title page, the report provides a page with a graph over three generations of the person's family of origin: spouse and children, parents and grandparents.

Then follows the complete individual record of the person of origin, his/her father and grandfather.

The report works with a standard genealogical entry, but it can provide several types of additional interesting elements.

Un siècle d'histoire familiale des KENNEDY :

- John, Fitzgerald (29 May 1917 - 22 Nov 1963)
- Joseph, Patrick (6 Sep 1888 - 18 Nov 1969)
- Patrick, Joseph (14 Jan 1858 - 18 May 1929)

Customization

The customization of this report consists in creating your own templates.

How do the models work?

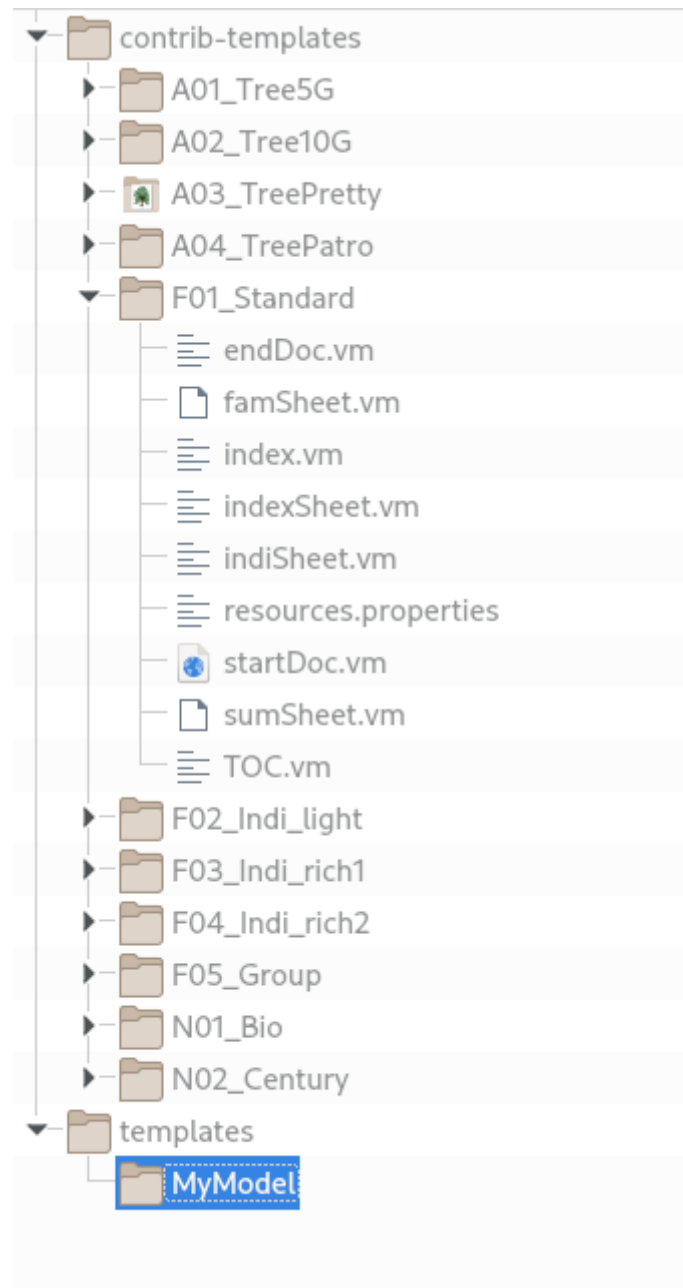

A template is a set of files located in a directory on your computer.

The first file used is the **index.vm** file.

This file is mandatory and its role is to make the link between the data and the presentation.

Where are the models placed?

The templates are in a subdirectory of the **User Directory**: **<User Directory>/ancestris/gedart**.

The contrib-templates directory is the one containing the provided templates. You do not need to add anything to it.

The templates directory is the one where you can put your own custom templates. You must not change the name of this directory.

How do I create a template?

To create a template, it is necessary to understand a certain formalism and be able to modify html format files using a text editor.

It is obvious that these manipulations, even if they are not very complex, will be difficult for beginners.

The best way to create a template is to start from the ones provided with Ancestris.

To do this, create for example a directory **templates/mymodel** and copy all the files in the **F01_Standard directory**.

In this new directory, open the **resources.properties** file. This is the one that contains the title of the template in different languages. Change the line of the template name in English "name = Standard Sheet" to "name = **MyModel**".

Then restart Ancestris or re-open the [**Lists and Reports window**](#). In the option tab of the Information Sheet report your template now appears in the drop-down menu.

You can then modify the files of the template **MyModel** as you wish according to the syntax explained below.

What is the syntax of the models?

The models use a file generation engine called **velocity** whose documentation is available on the [**velocity apache website**](#).

To have a first idea of this syntax, open the **Indisheet.vm** file in a text editor.

You will find similarities with the **html syntax** on one hand and the **Basic programming language** on the other hand.

What genealogical information can a template use?

A template can use all available information about the individual and the families on which the report was run.

See the examples provided to understand what can be done.

Do not hesitate to share your comments or wishes on the [**forum**](#) or on the [**Ancestris discussion list**](#).

How do I change the output format?

Although the template provided with the report produces a file in html format, it can be modified to produce a file in text, rtf or csv format.

Revision #11
