View Menu

This menu regroups all the actions **to access the genealogical views and editors** for the selected genealogy.

Each of these actions is described below.

> When the action has its own description page - it is bold - click on it to get all the details about it.

> These menu actions only apply to the **selected genealogy** and will therefore only be available if one is open. Otherwise they will be greyed out. To enable them, open a genealogy.

> The following descriptions relate to the **current genealogy**.

Entity Card

Displays the picture, the name and the events about the **current entity** (individual, family, etc.)

Entities Table

Provides the list of all the **entities** of the genealogy (individuals, families, notes, etc.) with their respective data fields (ID number, firstname, surname, etc.)

Dynamic Tree

Displays the genealogical tree of the individuals and families of the genealogy, with ancestors and descendants of the selected individual.

Timeline

Shows a temporal tree representation of all individuals in the genealogy.

Geographic map

Shows a geographic map with all located individuals' events in the genealogy.

Graph

Shows an innovative visual representation of all individuals in the genealogy in the form of a graph.

Quilt matrix

Shows your genealogical data as a diagonal matrix.

Cygnus Editor

Opens the Cygnus editor, an easy-to-use editor focused on individuals and their related events.

Gedcom Editor

Opens the Gedcom editor, specially designed to see and edit all existing data of the genealogy.

Aries Editor

Opens the Aries editor, an ergonomic editor that allows all types of modifications in multiple windows.

List of Places

Provides a list of all existing places in the genealogy. Each place is associated with their corresponding **events**. Gives access to the **places editor**.

Table of places

Gives access to a table-structured list of all existing places in the genealogy. Gives access to the **places editor**.

Simple Navigator

A simple way to select individuals schematically from a family nucleus.

Extended Navigator

A way to select individuals from a family nucleus while viewing their respective information and photos.

Advanced Search

Searches all individuals corresponding to multiple search criteria.

Provides a way to select these individuals to display or mark them later.
